### **FleetNet Digital Now Available in California's Wine Country**

Silke's FleetNet Digital is now serving California's Wine Country, thanks to work completed in the Central Valley, east of the Bay Area, and in the Sonoma and Napa valleys.

"There's a tremendous amount of activity in that portion of California, particularly related to agriculture and the hospitality industry," says President Jim Silke, Jr. "The network expansion is performing at a very high level and customer response has been good, with subscribers eager for the clarity that FleetNet offers."
