

COMMUNICATIONS

FOR IMMEDIATE RELEASE

February 21, 2012

**MANAGEMENT OF LIVINGSTON MOUNTAIN COMMUNICATIONS
FACILITIES ASSIGNED TO SILKE**

Silke Communications has assumed the management and marketing of a communications tower and facilities located at the base of the Columbia Gorge. The site is eight miles east of Vancouver, WA, north of Gresham, OR and the arterial I-84 leading toward the Rockies.

The company projects intense interest in the established site, particularly by wireless operators, communications companies, wireless internet providers and back-haul carriers. Like all the facilities Silke owns and manages, Livingston Mountain boasts security, back-up power and telco. It also offers fiber optic and microwave facilities.

Silke has updated the site amenities to exceed industry standards, and through its management agreement will provide all site support, including maintenance, system support and marketing of spectrum and physical tower space for development.

The facilities are located at 45-40-33/45.675833 latitude and 122-22-43.3/-122.378694 longitude at a ground elevation of 530.4 meters/1740.2 feet. The primary tower is 160-feet tall. For more information, visit www.silkecom.com/towers.

Silke Communications offers a full range of wireless communication services, from tower management, construction and marketing to communications systems sales and service for fleets and business/industrial applications. It also owns and manages two wide area networked, trunked radio systems: FleetNet™ Digital and FleetNet™ Classic are available on a subscription basis.

For more information about Silke Communications, visit www.silkecom.com, email or call 541-687-1611.
