FOR IMMEDIATE RELEASE

ACCESS TO MOUNTAINTOP SITES NOW EASIER WITH SNOWCAT RENTALS FROM SILKE COMMUNICATIONS

Eugene, OR -- With 30 communications towers to operate and maintain, Silke Communications knows first-hand how difficult it can be to access mountaintops during Oregon's snowy winter months. To those ends, the company is now offering snowcat rentals--provided with an operator--to those needing to scale the peaks of western Oregon's Coast and Cascade ranges.

Likely renters include companies with cellular, broadcast and microwave facilities; search and rescue teams; and scientific research teams looking to access remote monitoring sites.

Silke provides delivery and pick up, as well as an experienced and licensed operator. The company requests 24 hours notice, but will try to fulfill emergency requests as well. Rates and details are available by calling 541-687-1611 or emailing technicalsupport@silkecom.com.

Silke Communications is western Oregon's leading supplier of wireless radio solutions and communication tower services and spectrum. The company owns or manages more than 30 state-of-the-art, fully equipped communications facilities. A full list and map are available at silkecom.com/towers.

Based in Eugene, the 45-year old company provides a full range of services, from site construction, maintenance and operation, to delivery of VHF, UHF, 800 Mhz, Conventional, LTR and digital networks, including the respected FleetNet™ system.

Customers range from large public fleets to small private businesses throughout western Oregon and southwestern Washington, including Portland, Salem, Newport, Eugene, Florence, Bend, Cottage Grove, Roseburg, Coos Bay, Brookings, Grants Pass, Medford, and Klamath Falls.
